goSTOPS
JAS DEMAND ENGINE

Turning monsoon uncertainty into a reason to travel

A product-led, experience-led and community-led strategy to improve JAS RevPAB without depending on discounts.

- Increase RevPAB
- Protect Margin
- Extend Length of Stay
- Build Direct Demand
- Scale Across 70+ Properties

goSTOPS

JAS IS A DEMAND-CREATION PROBLEM, NOT A PRICING PROBLEM

The JAS quarter leaves most available beds unproductive

Peak occupancy	**70–75%**
JAS occupancy	**25–30%**
Peak RevPAB	**₹750–800**
JAS RevPAB	**~₹300**
Current direct-booking share	**50–60%**
~80% of current demand comes from travellers aged 18–30	

THE BUSINESS CHALLENGE

Create new JAS-specific travel occasions that:

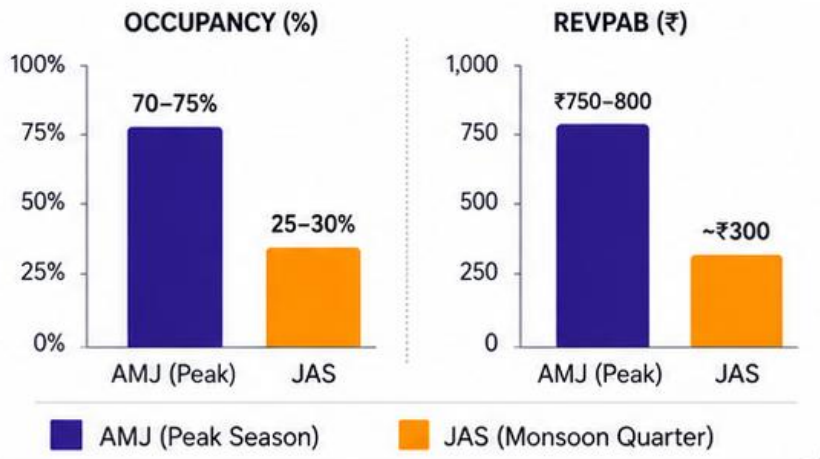

- Increase occupied bed-nights
- Protect contribution margin
- Extend average length of stay
- Build direct demand
- Work across a future network of ~70 properties

CRITICAL INTERPRETATION

₹300 compared with **₹750–800** represents an implied RevPAB decline of approximately **60–63%, not 35–40%.**

The precise baseline must be validated before final targets are approved.

AMJ vs JAS OCCUPANCY & REVPAB COMPARISON

goSTOPS

THE UNMET NEED IS CERTAINTY, PURPOSE AND SOCIAL VALUE

Flexible travellers do not necessarily need a holiday season. They need a compelling reason to use JAS differently.

CONSTANT CUSTOMER NEED

Affordable, safe and enjoyable travel with social connection.

- AFFORDABLE
- SAFE
- ENJOYABLE
- SOCIAL

WHY THE EXISTING OFFER STRUGGLES IN JAS

- Weather and transport uncertainty
- Reduced access to outdoor activities
- Fear of wasting limited leave
- Weak group-travel coordination
- Low perceived destination value

LATENT DEMAND OPPORTUNITY

REMOTE WORKERS
Productive change of environment

TEAMS
Affordable H2 reset

CREATORS
Distinctive locations and content opportunities

YOUNG TRAVELLERS
A socially validated reason to commit

A COMPELLING REASON TO USE JAS DIFFERENTLY

NEED GAP

Customers do not merely need a cheaper bed. They need confidence that a JAS stay will remain productive, social and memorable—even when the weather changes.

ONE CONNECTED SYSTEM CREATES, CONVERTS AND RETAINS DEMAND

The proposed JAS Demand Engine

1. MONSOON COLLECTIVE — PRODUCT LAYER

Bookable JAS formats

- 7-, 14- and 21-night workation stays.
- Two- and three-day team retreats.
- Limited creator and community weekends.
- Indoor and weather-safe destination programming.

WORKATION STAYS | TEAM RETREATS | CREATOR WEEKENDS | WEATHER-SAFE

2. #RAINCHECKIN — ACQUISITION LAYER

- JAS booking commitment or adjustable booking credit.
- Price protection rather than a blanket discount.
- Weather-flex rebooking assurance.
- Pre-season challenges and destination education.
- Group commitment mechanics.

3. MONSOON MAKER — EXPERIENCE & LOYALTY LAYER

- Participation-based points.
- On-property challenges.
- Community recognition.
- UGC and referral rewards.
- Direct-booking and repeat-stay progression.

STRATEGIC LOGIC

#RainCheckIn gets customers to commit → **Monsoon Collective** gives them a reason to stay → **Monsoon Maker** gives them a reason to participate, share and return.

Together, the engine creates demand, converts bookings, and builds repeat direct usage in JAS.

THE IDEA PASSES THE FOUR-MOAT TEST, SUBJECT TO CAPABILITY GATES

A disciplined assessment before committing to scale

FOUR-MOAT ASSESSMENT

MOAT	ASSESSMENT	IMPLICATION
PROFITABLE	Potentially attractive at scale, but the current pilot budget is not reconciled	Start with a lean MVP and contribution-based gates
UNDERSTANDABLE	"Work, connect and create during monsoon—with weather-flex assurance" is easy to communicate	Use one umbrella proposition
FEASIBLE	Uses existing rooms and common areas, but requires connectivity, safety and programming readiness	Pilot only at qualified properties
CAPABLE	goSTOPS has a young customer base, direct channel and community positioning	Add B2B sales, facilitation, CRM and product ownership

5C SNAPSHOT

COMPANY
Strong Gen Z fit, direct repeat demand and community positioning.

CUSTOMER
Flexible, value-conscious and digitally influenced.

COMPETITORS
Larger chains can imitate offers quickly.

COLLABORATORS
Coworking communities, HR networks, creators, local operators and transport partners.

CONTEXT
Seasonality, safety, connectivity and rainfall variability determine execution.

DECISION

Proceed to a **controlled pilot**—but not to a full technology build **before demand validation.**

LEAN MVP → VALIDATE → SCALE

SLIDE 6

THE STRATEGIC OPPORTUNITY IS SOUND, BUT THE PILOT ECONOMICS NEED CORRECTION

The strategy is directionally right; the three-property cost base is not.

ANSOFF DIRECTION

1 — PRODUCT DEVELOPMENT
Structured workations, retreats and programmed stays.

2 — MARKET DEVELOPMENT
Remote professionals and corporate teams.

3 — MARKET PENETRATION
Direct booking, loyalty and repeat-user activation.

NOT THE IMMEDIATE JAS ANSWER
Travel agencies, merchandise and long-term co-living should not be treated as the near-term solution.

THREE-PROPERTY CAPACITY LOGIC

3 PROPERTIES × 70 BEDS EACH × 92 JAS DAYS = **19,320** AVAILABLE BED-NIGHTS

OCCUPANCY BRIDGE

50% STRETCH

100% capacity = 19,320 bed-nights

BASELINE	45% TARGET
5,313 bed-nights	8,694 bed-nights

+3,381 INCREMENTAL BED-NIGHTS needed to reach 45%

+4,347 INCREMENTAL BED-NIGHTS needed to reach 50%

REVPAB & CONTRIBUTION

CURRENT JAS REVPAB **₹300**

SCENARIO A — ₹450
INCREMENTAL QUARTERLY BED REVENUE
₹29 LAKH
20% contribution ₹5.8 LAKH

SCENARIO B — ₹500
INCREMENTAL QUARTERLY BED REVENUE
₹38.6 LAKH
20% contribution ₹7.7 LAKH

BEFORE CAMPAIGN FIXED COSTS

ECONOMICS DO NOT RECONCILE
A ₹28.5 lakh pilot cannot break even at only three properties.

MANAGEMENT CHOICE

OPTION A — LEAN VALIDATION PILOT
Cap spend near the achievable contribution pool.

OPTION B — 15-PROPERTY COMMERCIAL ROLLOUT
Use a larger revenue base with stronger capacity to absorb fixed costs.

HIGH BUYER POWER MAKES EXPERIENCE DIFFERENTIATION ESSENTIAL

Porter's Five Forces and the defensible niche for JAS.

PORTER'S FIVE FORCES — JAS HOSPITALITY

Three forces are high → price alone is easy to compare and easy to copy.

DIRECTIONAL CONCENTRATION SIGNAL

Any concentration signal from tracked web-usage shares should be treated as directional only and not as a valid industry-wide HHI, because it excludes the fragmented long tail and does not represent the full market.

The fragmented long tail is excluded, so this is not a valid industry-wide HHI.

DEFENSIBLE NICHE

goSTOPS SHOULD OWN

Weather-confident, community-led and work-ready monsoon stays for flexible young travellers and teams.

The moat must come from these capabilities—not merely campaign names.

- Customer data
- Operating playbooks
- Safety delivery
- Community participation
- Partnerships

THREE NEED-BASED SEGMENTS CAN FILL DIFFERENT PARTS OF JAS

Each segment serves a distinct job-to-be-done and plays a different strategic role in JAS.

NEED-BASED SEGMENT PORTFOLIO — THREE DISTINCT DEMAND ROLES

REMOTE PROFESSIONALS — PRIORITY 1

JOB TO BE DONE
Work productively outside the city without using leave

WHY JAS WORKS
Flexible calendar, longer stays and fewer crowds

STRATEGIC ROLE
CORE OCCUPANCY DRIVER

CORPORATE & STARTUP TEAMS — PRIORITY 2

JOB TO BE DONE
Reset the team and align H2 priorities affordably

WHY JAS WORKS
H2 planning occasion and indoor-friendly programming

STRATEGIC ROLE
MARGIN & WEEKDAY DRIVER

CREATORS & STUDENT COMMUNITIES — PRIORITY 3

JOB TO BE DONE
Create distinctive work, learn and build a network

WHY JAS WORKS
Monsoon landscapes and shareable programming

STRATEGIC ROLE
REACH & COMMUNITY DRIVER

TARGET PRIORITY

1. **REMOTE PROFESSIONALS** — Connectivity-qualified properties
2. **TEAMS OF 10–40** — Dedicated B2B sales motion
3. **CREATORS + STUDENT COMMUNITIES** — Programmed cohorts—not the sole volume engine

REGIONAL VALIDATION REQUIRED

Student calendars, transport access and monsoon safety differ by region. “Students have a July break” cannot be used as a universal assumption.

THE DECISION JOURNEY MUST REPLACE UNCERTAINTY WITH PROOF

Travel during JAS is a high-involvement decision

WHAT THE CUSTOMER EVALUATES BEFORE BOOKING

- SAFETY
- CONNECTIVITY
- TRANSPORT
- ACTIVITIES
- CANCELLATION RISK
- PEER REVIEWS

AIDA + POST-PURCHASE REASSURANCE — PROOF AT EVERY STAGE

1 ATTENTION
MAKE JAS DESIRABLE

- Monsoon transformation content
- Creator-led destination stories
- *"Work where the rain improves the view—not interrupts your day."*

DISCOVERY

2 INTEREST
PROVE READINESS

- Live connectivity proof
- Indoor and outdoor programme calendar
- Property-specific weather and access information

CREDIBILITY

3 DESIRE
SHOW VALUE & SOCIAL PROOF

- Community previews
- Testimonials from remote workers and teams
- Clear comparison with city-living or resort costs
- Examples of content and experiences created during previous stays

PREFERENCE

4 ACTION
MAKE COMMITMENT EASY

- Flexible #RainCheckIn booking credit
- Simple direct booking
- Group commitment link
- Transparent rebooking conditions

CONVERSION

5 POST-PURCHASE
REASSURE BEFORE ARRIVAL

- Pre-arrival weather and access updates
- Backup programme confirmation
- Property WhatsApp community
- Proactive service recovery when activities change

STAY CONFIDENCE

DECISION LOGIC

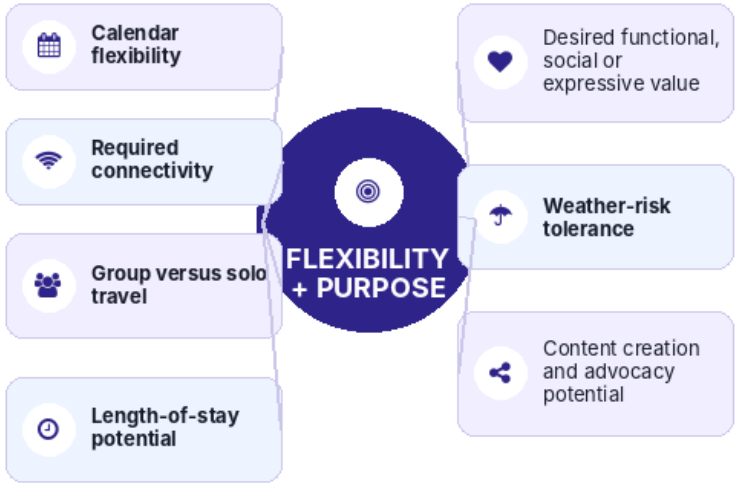

UNCERTAINTY → VISIBLE PROOF → CONFIDENCE → COMMITMENT → REASSURANCE

STP: TARGET FLEXIBILITY AND PURPOSE, NOT AGE ALONE

goSTOPS

1. **SEGMENTATION** — Variables that determine JAS fit
2. **TARGETING** — Primary and secondary ICPs
3. **POSITIONING** — Parity, difference and brand promise

1. SEGMENTATION VARIABLES

Segment on behaviour, need and travel flexibility—not age alone.

2. TARGETING — PRIMARY AND SECONDARY ICPs

PRIMARY ICP **22–35**

A 22–35-year-old remote or hybrid professional from a metro or large Tier-2 city who can travel outside conventional holidays, needs reliable connectivity and values community.

SECONDARY ICP **10–40 PEOPLE**

An HR, People Operations or founder-level buyer organising a 10–40-person H2 team offsite.

3A. POINTS OF PARITY

- Safe and clean accommodation
- Transparent pricing
- Easy booking
- Reliable basic amenities
- Social hostel environment

BASELINE EXPECTATIONS — MUST BE DELIVERED

3B. POINTS OF DIFFERENCE

- Verified work-ready infrastructure
- Weather-flex assurance
- Designed JAS programming
- Participation-based rewards
- Connected pre-, in- and post-stay community

DISTINCTIVE JAS VALUE — THE REASON TO CHOOSE

POSITIONING STATEMENT

For flexible young professionals and teams who want to use JAS rather than wait it out, goSTOPS is the community stay that makes monsoon productive, social and worth planning through reliable infrastructure, weather-smart experiences and rewards for participation—not just purchase.

PRODUCT: SELL A COMPLETE JAS OUTCOME, NOT AN EMPTY BED

A four-level product architecture that makes the monsoon useful, dependable and memorable.

THE FOUR-LEVEL PRODUCT ARCHITECTURE

MORE VALUE & DIFFERENTIATION

4 POTENTIAL PRODUCT

- Cross-property membership
- Portable customer status and community access
- Personalised JAS recommendations
- Property-level demand forecasting

3 AUGMENTED PRODUCT

- Workation format
- Team-retreat format
- Creator / community modules

2 EXPECTED PRODUCT

- Clean bed or private room
- Reliable booking and support
- Safe property
- Transparent inclusions

1 CORE BENEFIT

A useful and memorable monsoon period.

AUGMENTED PRODUCT — THREE COMPLETE JAS FORMATS

WORKATION FORMAT

7 / 14 / 21 NIGHTS

A productive long stay with reliable infrastructure and community.

- Verified Wi-Fi and backup connectivity
- Power backup
- Work desk and bookable call space
- Community dinners and weekend experiences
- Seven-, 14- and 21-night formats

PRODUCTIVITY + CONNECTION

TEAM-RETREAT FORMAT

WORK + ALIGN + RESET

An affordable H2 reset with space, facilitation and follow-through.

- Accommodation and meals
- Meeting infrastructure
- Facilitated team activity
- H2 planning session
- Reflection and action-plan capture

ALIGNMENT + TEAM VALUE

CREATOR / COMMUNITY

CREATE + SHARE + SHOWCASE

A rain-ready environment for distinctive work and shared output.

- Photography or storytelling sessions
- Rain-safe content areas
- Local culture challenges
- Final community showcase

CREATIVITY + COMMUNITY

COMPLETE JAS OUTCOME

Expected basics + purpose-built formats + community experiences + portable future relationship

THE OUTCOME: A USEFUL AND MEMORABLE MONSOON PERIOD

PRICE: PROTECT VALUE WITHOUT BECOMING A DISCOUNT CAMPAIGN

Use perceived-value pricing, cost floors and contribution targets to grow JAS demand without eroding margin.

PRICING PRINCIPLE

PERCEIVED-VALUE PRICING

Supported by cost floors and contribution targets.

CUSTOMER VALUE + COST FLOOR + CONTRIBUTION TARGET

↓

NORMAL JAS BASE RATE — NOT A PUBLIC "OFF-SEASON SALE"

RECOMMENDED PRICING ARCHITECTURE

1. **NORMAL BASE RATE**
   Publish a normal JAS base rate rather than a public "off-season sale."
2. **LENGTH-OF-STAY BUNDLES**
   Use duration bundles with real inclusions.
3. **RATE FENCES**
   Fence offers by weekday, duration, property and package.
4. **MODULAR ADD-ONS**
   Separate stay price from optional meals and experiences where contribution is uncertain.
5. **CORPORATE PACKAGES**
   Use minimum group size and date conditions.
6. **DIRECT-CHANNEL VALUE**
   Offer experiential benefits without undercutting OTA base prices.

#RAINCHECKIN — DEFINE THE PASS ONE WAY

OPTION A
BOOKING CREDIT / DEPOSIT
Adjusted against the final stay.

OR

OPTION B
CLEARLY PRICED MEMBERSHIP
With standalone benefits.

⚠ ACCOUNTING RULE: **Do not count it as both pass revenue and full booking revenue.**

PRICING ISSUES REQUIRING VALIDATION

WORKATION RATE	₹350–450 dorm pricing may be unprofitable when two meals and experiences are included.
CORPORATE PRICE UNIT	Resolve the inconsistent "per day" versus "per package" description.
REWARD LIABILITY	Cap the liability and recognise it financially.
PROPERTY-LEVEL PRICING	Respond to local demand and safety—not one uniform price across India.

PRICING NORTH STAR
Perceived value + real inclusions + clear rate fences + disciplined accounting

PROTECT VALUE WITHOUT BECOMING A DISCOUNT CAMPAIGN

SLIDE 13

PLACE: BUILD A DIRECT-FIRST, SEGMENT-SPECIFIC DISTRIBUTION SYSTEM

Match each audience with the right route to market while keeping the booking relationship direct-first.

REMOTE PROFESSIONALS

SEGMENT-SPECIFIC CHANNELS
Routes to prioritise for JAS demand

- CRM and existing repeat-user database
- LinkedIn and remote-work communities
- Coworking partners
- Referral communities
- Search and destination landing pages

CORPORATE TEAMS

SEGMENT-SPECIFIC CHANNELS
Routes to prioritise for JAS demand

- Dedicated B2B sales owner
- LinkedIn outbound
- Startup and HR networks
- Corporate travel managers
- Post-pilot case studies

CREATORS & COMMUNITIES

SEGMENT-SPECIFIC CHANNELS
Routes to prioritise for JAS demand

- Instagram and YouTube
- College photography and travel clubs
- Micro-creators
- Adventure and experience partners

CHANNEL ROLES — DIFFERENT JOBS, ONE DIRECT-FIRST SYSTEM

OTA
DISCOVERY
Discovery and standard inventory.

→

PARTNERS
TRUST
Trust and qualified lead generation.

→

DIRECT WEBSITE / APP
BOOK + RETAIN
Booking, bundles, flexibility and loyalty.

→

PROPERTY
EXPERIENCE + ADVOCACY
Conversion into experiences, ancillary spend and advocacy.

CHANNEL-CONFLICT RULE

MAINTAIN CONSISTENT
PUBLIC BASE PRICES
Maintain consistent public base prices across channels.

DIFFERENTIATE THE DIRECT CHANNEL USING

- FLEXIBILITY
- COMMUNITY ACCESS
- POINTS
- BUNDLED EXPERIENCES

PROMOTION: CONVERT MONSOON FROM AN OBJECTION INTO ANTICIPATION

Dolan's 6M turns the JAS proposition into a staged, measurable campaign—from proof to repeat demand.

DOLAN'S 6M — CAMPAIGN BLUEPRINT

MISSION	Generate incremental JAS bed-nights and direct pre-commitment.
MARKET	Remote professionals, teams and creator-led communities.
MESSAGE	"Monsoon becomes productive, social and memorable at goSTOPS."
MEDIA	Instagram, YouTube, LinkedIn, CRM, WhatsApp and partner communities.
MONEY	Release spending in stages against bookings and contribution—not impressions alone.
MEASUREMENT	Incremental bed-nights, RevPAB, contribution, direct share, conversion, length of stay and repeat intent.

CAMPAIGN SEQUENCE — BUILD → COMMIT → DELIVER → RETAIN

APRIL–MAY — 1. BUILD CONFIDENCE

PROVE TRUST

- Property readiness proof
- Connectivity tests
- Safety and access education
- Creator seeding
- Corporate outreach

MAY–JUNE — 2. CREATE COMMITMENT

LOCK DEMAND

- Open #RainCheckIn booking credits
- Group commitment links
- Remote-work and HR partnerships
- Publish programme calendars

JULY–SEPTEMBER — 3. DELIVER & AMPLIFY

CREATE STORIES

- Monsoon Maker challenges
- Property-level UGC
- Community events
- Weekly optimisation by channel and property

OCTOBER ONWARD — 4. RETAIN

BUILD LOYALTY

- Rewards summary
- Review and referral sequence
- Alumni community
- Next-JAS pre-registration

PROOF → PRE-COMMITMENT → STAY + UGC → REPEAT + REFERRAL

CAMPAIGN SCORECARD

BED-NIGHTS | REVPAB | CONTRIBUTION | DIRECT SHARE | CONVERSION | LENGTH OF STAY | REPEAT INTENT

CLOSE THE LOOP THROUGH VALUE, SATISFACTION AND LOYALTY

Balance traveller benefits and costs, deliver the promise consistently, and convert satisfaction into direct repeat demand.

CUSTOMER VALUE EQUATION

TOTAL BENEFITS − TOTAL COSTS = VALUE

TOTAL BENEFITS
What the traveller gains

- Productive stay
- Reliable infrastructure
- Social connection
- Unique experiences
- Flexibility & reassurance
- Recognition & rewards

MINUS TOTAL COSTS
What the traveller gives up or risks

- Money
- Travel time
- Weather risk
- Work disruption
- Planning effort
- Social uncertainty

SATISFACTION SYSTEM

1. **KEEP THE PROMISE** — Promise only what each property can deliver.
2. **PROVE READINESS** — Display connectivity and programme readiness.
3. **DESIGN BACKUPS** — Provide indoor equivalents for weather-affected activities.
4. **COMMUNICATE EARLY** — Communicate disruptions before arrival.
5. **RECOVER FAST** — Offer fast rebooking or credits.
6. **MEASURE SATISFACTION** — Measure NPS by property and product.

LOYALTY DESIGN

BEHAVIOURAL LOYALTY
Make the next direct purchase easier

- Direct booking
- Stored preferences
- Booking credits
- Convenient repeat purchase

ATTITUDINAL LOYALTY
Build identity, recognition and belonging

- Community identity
- Maker recognition
- Creator showcases
- Alumni groups

UTILITARIAN VALUE → VALUE-EXPRESSIVE BELONGING

PILOT DECISION GATES

1. **READINESS** — Connectivity • safety • facilitators • booking flow verified
2. **DEMAND** — Minimum pre-committed bed-nights achieved.
3. **MID-SEASON** — Occupancy >40% • RevPAB >₹400 • NPS >50
4. **SCALE** — Positive contribution • repeatable playbook • acceptable incident rate

FINAL RECOMMENDATION: Approve a lean, instrumented pilot of the connected JAS Demand Engine. Scale only after property-level demand, contribution and safety performance are demonstrated.
